## IMPORTANT

Before opening your Lights.com fixture, please make sure that you carefully read through these instruction sheets. Consider having your fixture installed by a qualified licensed electrician.

**NOTE:** The important safeguards and instructions that appear in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care, are factors that can’t be built into any product. This approach must be used by the person(s) caring for and operating the fixture.

## GENERAL INFORMATION

All electrical connections must be in accordance with all ordinances, Local and National Electrical Codes. These fixtures are intended for mounting to a standard 4” x 2-1/2” metal octagon box. The box must be directly supported by the building structure and U.L. Recognized.

## STEP BY STEP INSTRUCTIONS

Before starting your installation, disconnect the power by turning off the circuit breaker or by removing the fuse at the fuse box. Just turning the light off at the light switch is not sufficient to prevent electrical shock.

### WHAT YOU NEED
- Phillips head Screwdriver
- Wire Cutters
- Wiring Supplies as Specified by Electrical Code
- Electrical Tape

### WHAT WE PROVIDE
- Atlas 11” Vanity Light
- Mounting & Wiring Hardware
- Glass Shade

### COLLECTION
- Atlas

### APPLICATION
- Wall Sconce
- Vanity Light

### MODEL NO.
- LC004087
- LC004088
- LC004090
2 PREPARE FIXTURE AND MOUNTING PLATE
Remove the mounting plate from the backplate by unscrewing the side screws from the backplate.

3 INSTALL THE MOUNTING PLATE
If there is an existing fixture, remove it. Expose the supply wires from the J-Box. Insert supply wires through the mounting plate. Secure the mounting plate using the two Phillips head screws provided. Tighten to secure.

4 MAKE WIRE CONNECTIONS
Connect the BLACK fixture wire to the BLACK supply wire and the WHITE fixture wire to the WHITE supply wire. Connect the fixture ground wire to the J-BOX ground wire or wrap around one of the protruding screws on the mounting plate. Secure all connections with the supplied wire nuts and electrical tape (not supplied).
**INSTALL THE GLASS SHADE**

Slide the glass shade onto the top of the vanity light.

---

**CONNECT FIXTURE TO THE MOUNTING PLATE**

Position backplate over the mounting plate. Align the holes on the sides of the mounting plate with the two holes on the sides of the backplate and secure with the supplied screws.

---

**NOTE:** This is a light emitting diode (LED) fixture. The LED board is fixed to the inside of the vanity/wall sconce. This is your light source. The fixture is rated to last upwards of 50,000 hours.

For the best lighting experience, we recommend using a dimmer. Not only does this allow you to create a great ambiance, it allows for energy savings and extends the life of the LEDs.

---

**RESTORE THE ELECTRICITY AND CHECK THE OPERATION OF YOUR NEW FIXTURE**

---

**DIMMER NOTE**
