

IMPORTANT

Before using your LampLust Shooting Star Garden Lights, please make sure that you carefully read through these instruction sheets.

NOTE: The important safeguards and instructions that appear in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors that can't be built into any product. This approach must be used by the person(s) caring for and operating the lights.

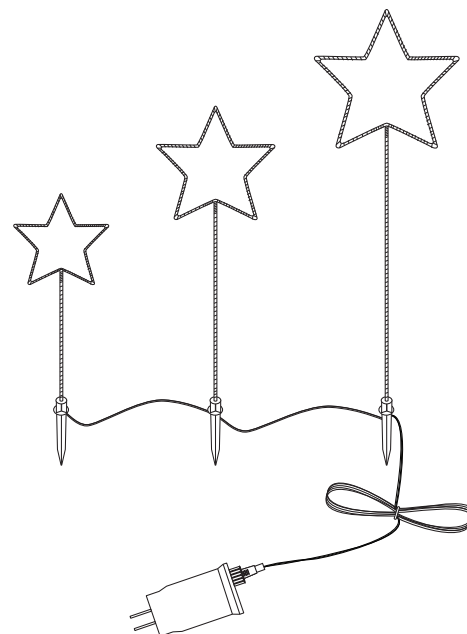

GENERAL INFORMATION

These lights are suitable for indoor and outdoor use. DO NOT attempt to replace or repair any damaged cable parts. After use, ensure the garden light set is clean and dry before storage.

DO NOT DISPOSE OF IN FIRE. Please dispose at your local recycling facility.

STEP BY STEP INSTRUCTIONS

Before operating your garden lights remove packaging. When setting up the lights, carefully position cables to avoid a tripping hazard.

WHAT WE PROVIDE

- 3 Shooting Star Garden Lights with Plastic Ground Stakes
- Plug-In Power Supply

WHAT YOU NEED

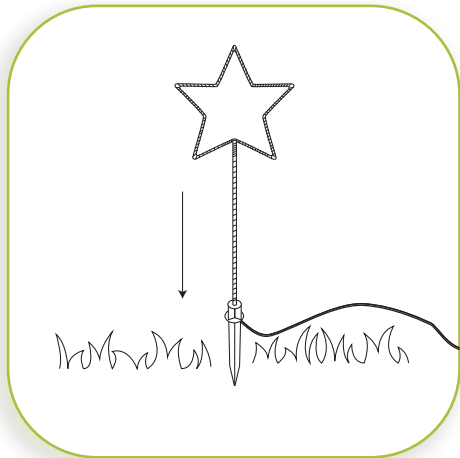

- Garden Implement (to make a hole in the ground)

1

CHOOSING THE RIGHT LOCATION

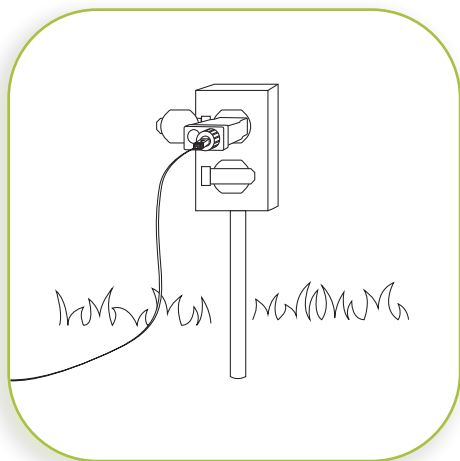

Be sure to select a location that has a power outlet within the range of the lead wire.

2

STAKE INSTALLATION

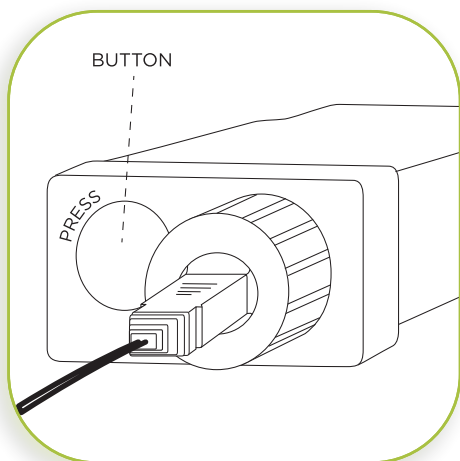

Check that the ground in your selected location is not too hard as you may cause damage to the stake and pole if excessive force is used. If the ground is too hard, pour water on the desired location in order to soften the soil. Use a garden tool to make a hole in the ground and push the stake into the ground as far as the top ridge, but take care to not insert the stake too far. Please note that garden light stakes should not be inserted into ground that is frozen. There are 2 feet of wire between the lights so that you can arrange as desired.

3

POWERING THE LIGHTS

Carefully insert plug into an outlet.

4

BUTTON OPTIONS

Utilize the button included on the plug to operate the garden lights. Press the button repeatedly to cycle through the different light functions until you select your preferred option.

The various functions are:

1. Combination
2. In Waves
3. Sequential
4. Slo-Glo
5. Chasing/Flash
6. Slow Fade
7. Twinkle/Flash
8. Steady On.

Once you select your preferred light function, an 8 hour timer is automatically activated. The lights will remain on for 8 hours and will turn on and off at the same time each day.
